ROAD MAP
TO
CHERRY HILL FARM
OLIVER W. WOLTON

Greetings

We take pleasure in presenting to you our 1949 catalog of Tall Bearded Iris and trust that it will prove to be of interest.

Most careful thought has been given to the varieties which are grown and offered to our growing list of satisfied customers. Out of over two thousand recognized varieties, we have selected those offered and described in this booklet as most worthy of your consideration. Among the list are varieties which have made great names for themselves in the past years, others which recently became most popular and are in great demand by Iris Lovers everywhere. There are also the best of the new introductions created by the leading hybridizers of the country which have every indication of becoming real hits and the Iris "greats" of tomorrow. You can depend on each and every one, with ordinary care, to give most satisfying results in your garden.

NEW LOCATION

Our Gardens are now located one-half mile west of the village of Pleasant Valley, Penna. See Road Map on inside cover. Visitors are most welcome at all times during the blooming season. We hope that anyone living within easy driving distance will make an effort to see our Iris in bloom for they are far more gorgeous than words can describe. The normal blooming season for Bearded Iris in this locality is usually from May 12th to June 12th. This season we recommend visiting our gardens from May 20th to May 31st in order to see the largest number of varieties in flower.
